## FLEXIBLE INSULATION SOLUTIONS TARGETED TO OUR CUSTOMERS NEEDS

Flesoltec® is dedicated to the manufacture of protection, thermal and acoustic flexible industrial insulation used in various industrial equipment.

Our products allow an increase in energy efficiency, considerably reducing heat losses, as well as enabling soundproof environments with high levels of noise and the protection of workers in limited mobility environments.

Flesoltec® uses the best quality raw materials in the manufacture of its products, according to the needs of each client individually, aiming to offer highly resistant and durable custom-made solutions.

FleSOlTec®

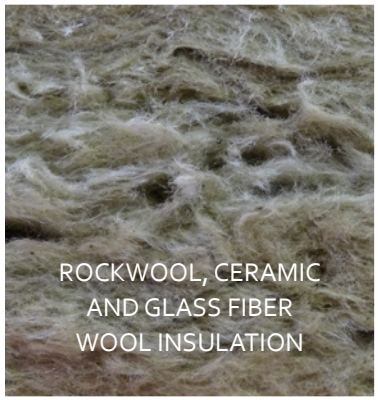

Energy Efficiency

**ENERGY EFFICIENCY:**

Flesoltec® energy efficiency line of products is used in boilers, valves, extruders, pumps, flanges, joints, filters; places where heat losses that lower the efficiency of the process are detected. Flesoltec® flexible isolation solutions are reusable and easy to use, being an excellent solution for places that are the target of frequent maintenance.
